

Application Fluid

Positioning fluid for stickers

- ✓ Easy removal of air bubbles
- ✓ Pleasant scent
- ✓ Safe for all surfaces
- ✓ Free from acids and solvents

Solvents and degreasers

Application Fluid is a versatile, fast-evaporating liquid that is ideal for applying self-adhesive advertising text, stickers and films. Thanks to its unique composition, the product remains active for just long enough, combining the benefits of both dry and wet application.

Application

With Application Fluid, you can position the advertising text, sticker or film perfectly. This ensures a professional application with rapid adhesion, without air bubbles or soap residue. As no chemical residue is left behind, the sticker or film retains the best possible adhesion.

The fluid evaporates completely, making it an excellent choice for both large and small stickers and advertising text in the advertising, construction and transport sectors.

Instructions

- Ensure the surface is free of dust.
- Degrease the surface where the sticker is to be applied.
- Generously moisten both the surface and the sticker with the Application Fluid.
- Apply the sticker to the surface and position as desired.
- Take a Foil Applicator (item 2601) and press out any excess fluid and air from beneath the sticker.

Specifications

Characteristic:	Value:
Base	A mixture of surfactants and water
Consistency	Liquid
Application	+10°C to +40°C
Storage	Store in a cool, dry place

Packaging
